

ENTRYTEC BU is a reversible profile which trims entrance mats in natural fibers, carpeting, and even technical aluminum mats. The unique profile shape can be positioned in two directions to contain the most common mat thicknesses, 11/16" and 29/32" (18 and 23mm). To accommodate thinner mat thicknesses, fill the matwell with mortar to achieved the desired level. This easy-to-assemble profile must be installed before the adjacent flooring. ENTRYTEC BU can also be anchored with modular connectors that slide inside the profile section.

entrytec BU

ENTRYTEC BU 18/23 AS Silver Anodized Aluminum

This reversible aluminum profile can contain two mat thicknesses: 11/16" and 29/32" (18mm and 23mm).

ENTRYTEC BU 18/23 ON Natural Brass

This reversible natural brass profile can contain two mat thicknesses: 11/16" and 29/32" (18mm and 23mm).

ENTRYTEC BU* Assembly Accessories

1. Brass connectors which anchor in the concrete.
2. Aluminum brackets for perfect 45DEGREE corners.
